

Industrial Strength Serpentine Bike Racks

Produced from continuous, schedule 40, 2" nominal Pipe. Wagner serpentine bike racks are produced in high-quality steel or type 304 stainless steel. The steel bike racks are available with a mill or hot-dipped galvanized finish while the stainless steel racks are available with a satin finish. Select from 1, 3, 5, 7, 9 or 11 loop styles to suit your specific needs, configurations and budget. The racks are easily installed for high security using an in-ground mount or available surface mount kit. Contact Wagner regarding ways in which your bike rack can be uniquely branded for your location—i.e., adding signage or incorporating a logo.

Custom Bike Rack Designs

Wagner is a specialist in pipe and tube bending. Send us your custom bike rack designs. Custom racks can be made to meet your specific requirements at competitive prices. Many municipalities use bike racks made from square tube to deter thieves with pipe cutters. Contact Wagner to learn more about bike racks made from 2" square tube.
