

Wet Glaze Glass Railing

Standard Base Shoe Moulding

Aluminum, 6063-T52 alloy. For mounting glass railing systems for standard wet glaze. Portland cement is not to be used with laminated glass. Use grout that is compatible with laminated glass and appropriate for the installation location (indoor/outdoor).

Produced from extruded aluminum, they may be anodized, painted or clad to match the top rail or area decor.

Base shoe moulding may be surface mounted, fascia mounted or embedded in concrete. The shoe is the key to the structural integrity of any glass railing system.
