

Cable Railing Assemblies - Ready to Install

Type 316 stainless steel cable railing assemblies come with hardware fittings, washers, fasteners, cable and instructions. All Ultra-tec® kits come in lengths of 5' to 25'—in 5' increments—with one tensioner and a swageless stop end. Most are available in lengths up to 50'. Kits with tensioners at both ends are available for going around corners in 30' to 50' lengths. With kits, you cut the cables to length on site.

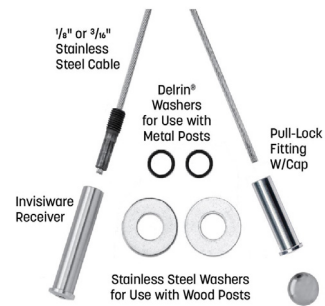

200 Series Cable Assemblies

For outside-of-post to outside-of-post applications, use the 200 Series (or 272 Series):

- If wood posts, use the 262 Series.
The tensioning device is a 3 1/2" long Invisiware® Receiver, which installs flush through the wood post on one end. A Pull-Lock™ fitting is installed through the other end.
- If 1 1/2" metal posts, use the 212 Series
- If 2", use the 232 Series
- If 2 3/8", use 224 Series

The tensioning device is a 1 1/2", 2" or 2 3/8" long Invisiware Receiver, which installs flush through the metal post on one end. A Pull-Lock fitting* is installed through the other end.

* Minimum 6" additional cable for Pull-Lock to grasp on and pull.
